portfolio-madiha-14s-projects.vercel.app

Third-year B.Tech CSE (Data Science) student who builds complete data products end to end — from cleaning and modelling data to shipping a working interface around it. Comfortable across the full stack of a data role: statistical analysis, machine learning, dashboards and the front-end to present it all. Looking for a data science / analytics internship to bring that same build-it-fully mindset to a real team.

SKILLS

Programming

Python, Pandas, NumPy, Java, R, MySQL

Data Manipulation & Analysis

Data Cleaning & Preprocessing, EDA, Feature Engineering & Selection, Handling Missing Data & Outliers, Data Wrangling (Pandas & SQL), Statistical Analysis, Hypothesis Testing

Web Development

HTML5, CSS3, JavaScript, React

Domain Knowledge

Operating Systems, DBMS, Computer Organization & Architecture (COA), Data Privacy & Ethics, Regulatory Awareness

Machine Learning

Supervised & Unsupervised Learning, Model Evaluation & Validation, Hyperparameter Tuning

Data Visualization

Matplotlib, Seaborn, Plotly, Power BI, Dashboard Creation, Visual Storytelling, Insight Communication, Interactive Visualizations

Tools

VS Code, Jupyter Notebook, Google Colab, RStudio, Git, GitHub, Canva

Soft Skills

Communication, Collaboration, Curiosity, Attention to Detail, Organized

EXPERIENCE

MS Intern Solutions — Virtual Internship

Jul – Sep 2025

Diabetes Prediction System — built a machine learning model to predict diabetes risk from patient health data (age, blood pressure and related factors), then deployed it behind a working web interface for real use, not just a notebook demo.

Python · Scikit-learn · Flask · Streamlit · HTML

PROJECTS

Personal Portfolio Website

Responsive personal site with an interactive UI and dedicated sections for projects, skills and certifications.

HTML · CSS · JavaScript · React

CraftFolio — Portfolio Generator

Web app that generates customizable, downloadable HTML portfolios with drag-and-drop layout building and a live preview.

React · FastAPI · dnd-kit

NeuroHaven — Insider Threat Detection

Anomaly-detection system that flags insider threats by learning normal behavioural patterns and surfacing what breaks them.

Python · Machine Learning · Data Analysis · React

CERTIFICATIONS & RECOGNITION

◆ AI & Python for Machine Learning

AI / Python Track

◆ Python Advanced

Python Certification

◆ JavaScript Fundamentals

JS Certification

◆ Deloitte Data Analytics Job Simulation

Deloitte × Forage · Jul 2026
